QUANTM ELECTRIC DIAPHRAGM PUMPS

DIAPHRAGM PUMP ACCESSORIES

HIGHEST PRODUCTIVITY & ENERGY EFFICIENCY

Graco's QUANTM electric-operated double diaphragm (EODD) pumps combine the advantages of an AODD pump like self-priming, stalling under pressure, and increased diaphragm life with the efficiency of an electric drive.

Electric drive

- Up to 80% more efficient than AODD pumps
- Eliminate the requirement for compressed air, relieving the load on air compressors
- IE5 energy efficiency classified

Quiet operation

- Eliminating compressed air drives significant noise reduction
- 23% reduction in sound pressure over standard AODD pumps
- 90% decrease in sound intensity

Integrated control

- Control the pump with the turn of a dial
- Features intelligent Auto-Prime mode for faster priming
- IP66 wash-down rated
- Leak detectors are standard to monitor for diaphragm rupture or other leaks

Automation

- Equipped with an I/O port for remote or PLC pump control to start or stop the pump and adjust speed or to add a level sensor

Small footprint

- Similar in size to Graco's AODD pumps
- Removal of the gearbox reduces footprint compared to other electric options

SOLOTECH PERISTALTIC HOSE PUMPS

MAXIMUM MATERIAL PRODUCTIVITY

With only the hose in contact with the fluid being pumped and no check valves in line, Graco's SoloTech peristaltic pumps are ideal for metering and transferring materials that other pumps cannot handle.

Efficient pumping action

- One hose compression per revolution extends hose life

Lowest maintenance

- No valves, seals or glands

Pumps widest range of material

- Patented design ensures only the hose comes in contact with fluid
- Easily pumps abrasive, corrosive, shear sensitive, and gas entrapped fluids

Reversible

- Pumps can be used to empty lines or clear blockages

Extended hose life

- Only one hose compression per revolution

Single roller design

- Compresses through a full 360° rotation, reducing temperature and friction
- Delivers longest hose life
